

Fibres have flagged ends to trap dust and fine dirt.

Dual Angle Upright Broom

Head And Fibres Made Of
Recycled Materials

This professional grade broom is a smart choice for the environment with the head and fibres made from 100% recycled PET plastic. Ideal for indoor sweeping, the fine fibres are flagged at the ends to trap and hold the most dust and dirt. The dual angle head gives the user the flexibility between different tasks. The broom can be used in the regular upright position for general sweeping or use the offset hole to pitch the handle 15° for reaching under equipment. Available in 2 sizes, small (6 inches) and large (9 inches) with or without a 48" metal handle.

Features And Benefits

- Head and fibres are made from 100% recycled PET plastics.
- Fibres have flagged ends to trap dust and fine dirt and are oil and solvent resistant.
- Dual angle head allows the user to choose the best handle angle for a specific task.
- Can be ordered complete with 48" metal handle.
