

Flexsweep®

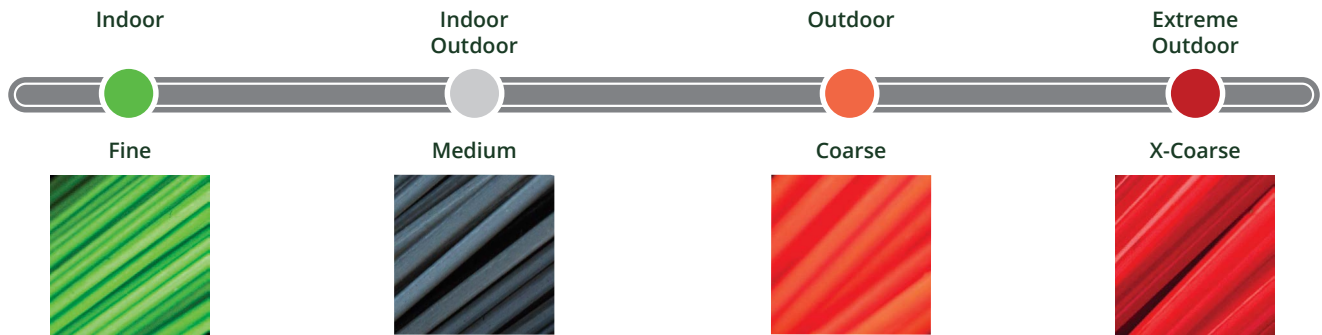

Push Brooms

The Flexsweep push broom is the only broom with a connector that flexes slightly to absorb shearing stresses and eliminate breakage at the point where the handle meets the head. Made with specially engineered elastomers and polymers, the connector removes the requirement for heavy steel braces and gives the broom a lower profile for getting around and under equipment.

This broom connector is unbreakable and comes with a lifetime warranty when used under normal sweeping conditions.

The Flexsweep® connector is unbreakable, it flexes to eliminate shearing stresses.

Features And Benefits

- Fibres are colour-coded to quickly identify the sweeping action.
- The Flexsweep connector has all the strength of a braced broom in a go anywhere low profile.
- 60 inch x 1 1/8 inch hardwood handle is the strongest available.

Assembled	Size (in)	Fibre	Type	Pack
99960	18	Fine	Synthetic	4
99964	18	Medium	Synthetic	4
99965	24			4
99970	24	Coarse	Synthetic	4
