

Extra-coarse fibres easily
move heavy dirt and debris.

Track Broom

Upright Broom With Chisel

Ideal for rail and road maintenance and construction. On the rails: Sweep gravel and rocks away from ties, or use the heavy-duty chisel to chip away stubborn ice buildup in expansion joints, rail switches or on other equipment that needs to be kept clean and clear.

In the garage or construction site: Move heavy debris easily with extra stiff, oil-resistant polypropylene fibres. Use the chisel to remove hardened mud, ice or tar from hard surfaces.

Features And Benefits

- Coarse polypropylene fibres with heavy gauge wire band clear the heaviest debris from uneven surfaces.
- The broom’s heavy-duty forged steel chisel is designed to chip away ice and dried mud with ease.
- Solid hardwood handle and fully closed metal cap with riveted construction add to the durability of this industrial strength upright broom.
